MEDIA RELEASE

Supporting senior secondary students on a pathway to the future

Education Council has commissioned a review of senior secondary pathways to examine how students can be supported to choose the best pathway into work, further education or training.

The review will be led by Professor Peter Shergold AC, and will provide advice and recommendations to Education Council on the skills and knowledge young people need to thrive beyond school.

It will look at whether current arrangements are supporting students to make the best decisions for their future.

The panel brings together experts in school operations, industry, vocational education and training (VET), university entry requirements, student engagement and wellbeing, and the delivery of secondary education to disadvantaged students. The review panel includes:

- Chair – Professor Peter Shergold AC
- Professor Tom Calma AO
- Ms Sarina Russo
- Ms Patrea Walton
- Ms Jennifer Westacott AO
- Dr Don Zoellner
- Mr Patrick O’Reilly

Education Council Chair and Australian Government Minister for Education Dan Tehan said senior secondary education plays an important role in preparing young people for life beyond school.

“The review will help ensure senior secondary schooling is supporting our young people to make informed choices, and that they’re leaving school with the skills and knowledge they need to succeed,” Mr Tehan said.

“We must ensure that all pathways are equally valued, and that our young people can access a secondary education that can equally prepare them for work, VET or higher education.

“I encourage key stakeholders with an interest in senior secondary education and our future workforce to take part.”

The Review is one of eight national policy initiatives under the National School Reform Agreement. The Review is informed by a recommendation from the 2018 report, Through Growth to Achievement: Report of the Review to Achieve Education Excellence in Australian Schools.

The Review will report to the COAG Education Council in June 2020.

Optimising senior secondary pathways into work, further education and training

Terms of Reference

Context
Research shows that students who complete senior secondary education have a greater likelihood of continuing with further study, entering into the workforce, and improved living conditions. Today's students, however, face a range of challenges due to technological change, globalisation and automation. Senior secondary graduates will need a broader and different mix of skills compared to previous generations, including stronger problem solving, communication and digital skills, as well as critical and creative thinking. They will also need the skills to navigate an increasingly complex range of options and pathways into further education and training.

In recognition of the important role senior secondary education plays in preparing students for the rapidly changing world beyond school, *Through Growth to Achievement: Report of the Review to Achieve Educational Excellence in Australian Schools* recommended establishing an independent inquiry into senior secondary schooling. The recommendation has been formalised in the national school reform agreement as a national policy initiative to review senior secondary pathways into work, further education and training (the Review).

The Review will report to Education Council as outlined in the National School Reform Agreement 2019-2023.

Responsibility for senior secondary pathways into work, further education and training fall across levels of government, from the schooling system to vocational and higher education sectors as well as employers and industry. While the review will report to the COAG Education Council, which has responsibility for schooling, the recommendations may have broader systemic implications and will need to be considered in this policy context.

Purpose
The Review will provide Education Council with advice and recommendations on how senior secondary students can better understand and be enabled to choose the most appropriate pathway to support their transition into work, further education and/or training. In undertaking the review the expert panel will give consideration to the different contexts faced by disadvantaged students, including students with disability, those in regional, rural and remote areas, and Aboriginal and Torres Strait Islander students.

The expert panel will:

1. Explore the efficacy of senior secondary education in preparing young people for diverse pathways to further learning and work, including:
   a. identifying from existing curriculum frameworks and relevant research, the essential knowledge, skills and values needed for diverse pathways to life long learning, work and effective participation in civic life.
   b. identifying the skills and knowledge students, employers, vocational education and training (VET) providers, and higher education institutions perceive are essential for successful post school transitions.
   c. clarifying the roles and responsibilities of key stakeholders, such as schools, students, parents, VET providers, higher education institutions, and employers, in supporting inclusion and preparing school leavers for life beyond school, whatever pathway they choose.

2. Investigate whether current certification and university entry requirements, including other credentials such as the International Baccalaureate, assist in allowing students to make the study choices that are right for them to develop the skills and knowledge they need to access the most appropriate pathway into work, further education and/or training.
3. Investigate barriers to students being able to equitably access all pathways, particularly for students in rural, regional and remote areas, Aboriginal and Torres Strait Islander students, students with disability, those who struggle to make transitions to work, further education and training, and potential early school leavers.

4. Identify best practice in flexible delivery options, transition and engagement support arrangements for students transitioning from Year 10 to Year 11, as well as from Year 12 to post-school destinations including:
   a. career education and awareness that supports inclusion and includes information linked to labour market outcomes for all pathways, to support students to make informed decisions about their study, training and career options, as well as develop career management skills
   b. the role and impact of teachers, school leaders, and different models of schooling, such as alternate education settings for disengaged students, distance education and/or home education, in successful transitions
   c. vocational education and training delivered to secondary students that leads to strong transitions
   d. work-based learning and industry partnerships
   e. higher education
   f. the role of student wellbeing on their ability to engage in different types of learning, including VET, academic and work-based learning, to facilitate completion of year 12 and transition to successful pathways.

5. Investigate what, when and how data should be collected to capture experiences, identify pathways and measure the impact of delivery options, subject choice (including academic and VET) on student outcomes and destinations, to ensure continuous improvement.

Related Reviews
The Review will have regard to relevant findings and recommendations of:

3. *Optimising STEM Industry-School Partnerships*, 2018, chaired by Dr Alan Finkel, AO
5. *National Aboriginal and Torres Strait Islander Education Strategy*, 2015, Education Council
10. *One Teaching Profession: Teacher Registration in Australia, September 2018*, the Australian Institute of Teaching and School Leadership
11. *Unique Individuals, Broad Skills, Inquiry into school to work transition*, 2018, House of Representatives Standing Committee on Employment, Education and Training
13. Submissions by state and territory Departments of Education to the above reviews.
Roles and responsibilities
In order to address the terms of reference the panel will:

1. call for written submissions and undertake face to face consultations with experts and key stakeholders across Australia, including young people, parents, employers, and representatives from the schooling, vocational education and training and higher education sectors

2. ensure the review identifies and supports inclusive practices and considers the circumstances and particular needs of students with disability, those from rural, regional and remote areas, students from low socio-economic status backgrounds, Aboriginal and Torres Strait Islander students, and other students at risk of not making successful transitions from school to work or further education or training

3. commission independent research relevant to the Terms of Reference, if required, to ensure the review is underpinned by a sound evidence base

Membership
The Review will be undertaken by a panel including a Chair and six members. The panel brings together expertise in one or more of the following areas: school operations; employers; vocational education and training; university entry requirements; expertise in the delivery of secondary education to disadvantaged students; and student engagement and wellbeing.

Education Council has agreed the following panel members based on their expertise to satisfy these Terms of Reference:

<table>
